

ANDREW G. ARGEROS

Dedicated and driven current undergraduate student with a passion for statistical, analytical, and data driven approaches to modern issues. Enjoys problem solving through data driven thinking and computational methods.

Skilled in applications of **R**, **SQL**, and **Python**. Avid presenter at national data science competitions. Looking to gain experience in the corporate sector and to further skills in machine learning at scale.

EDUCATION

2022
(exp.)
|
2018

- **B.S. Computational Data Science; B.B.A. Business Analytics; Minor in Economics**
Hamline University St. Paul, MN

- Advisors: Dr. Stacie Bosley and Dr. Andy Rundquist
- President's Scholarship Recipient & Heim Scholar
- NCAA Varsity Athlete: Men's Tennis

2018
|
2014

- **High School Diploma**
Coon Rapids High School Coon Rapids, MN

- Graduated with Honors
- Two time AP Scholar with Distinction

RESEARCH EXPERIENCE

Current
|
2020

- **Research Assistant to the Dean**
Hamline University School of Business St. Paul, MN

- Hired in 2020 for ad hoc data science needs in the Hamline Business School. Responsibilities include working closely with Dean McCarthy, Support Staff, and Faculty to effectively manage and deploy analytics and data science projects.
- Student Analytics Director of DAC @ Hamline high school data analytics competition.

2020
|
2019

- **Research Assistant to Dr. Eric Hammer**
Hamline University School of Business St. Paul, MN

- Analyzed modifications to inputs of Hawk/Dove game theory model through use of agent based simulation modeling.
- Planned collaboration on a project studying cultures' proverbs and "pop-culture" on voting behavior. Based on the work of Michalopoulos and Xue (2017) on the effects of folklore on rational voting theory.

INDUSTRY EXPERIENCE

Current
|
2020

Data Science Intern

ExceleraRx LLC - Shields Health Solutions

📍 Minneapolis, MN

- Currently directing and implementing at-scale analytics and production grade machine learning systems affecting major health systems, pharmaceutical manufacturers, payers, and pharmacies in the realm of specialty pharmacy.
- Built machine learning systems to identify patients at risk for inadherence in subpopulations of metastatic breast cancer and hepatitis C patients. Currently in production at several national health systems.
- Built a production string matching system using Zero Shot Natural Language Processing to match raw prescription text to analyzable data using serverless computing systems.

2021
|
2020

Consultant Data Scientist

Economic Development Company of Lancaster County

📍 Lancaster, PA

- Used advanced Natural Language Processing (NLP) and Computer Vision (CV) methods to analyze real-estate trends within the county. Lead a research project to be presented to Lancaster developers and realtors.

2020
|
2019

Consultant Data Scientist

Minnesota Hospital Association

📍 St. Paul, MN

- Analyzed workforce data on MHA's members for the association's annual workforce review.
- Presented analysis to statewide health system leaders.

2020
|
2019

Financial Planning & Analysis Intern

Northwestern Mutual

📍 Minneapolis, MN

- Worked on a team of six to analyze, forecast, and manage the financial outlooks of more than two thousand clients across the country. Oversaw client investment processes from onboarding through investment and rebalancing.
- Built a system using R and Shiny to effectively manage the department's invoicing system.

DATA SCIENCE PROJECTS

2021

Compliance to Recommended Tuberculosis Screening Prior to Initiating Biologic Treatment Across a Network of Health System Specialty Pharmacies

Pharmacy Quality Alliance Annual Meeting and Conference

📍 Virtual

- Analyzed effects of date-verified screening for tuberculosis patients within the Excelera Network with respect to patient adherence and outcomes.
- Listed as acknowledgment due to lack of pharmaceutical degree.

- 2021 ● **March Madness¹**
MinneMUDAC 2021 📍 Virtual
- Built a machine learning system based on bootstrapped random forests to accurately predict game outcomes in the 2021 NCAA Men's Basketball Tournament.
 - Finished in top 25% of participating teams both graduate and undergraduate.
 - Bracket finished in 90th percentile of ESPN's Tournament Challenge.
- 2020 ● **Optimizing New York City's Housing²**
BAC @ MC 2020 📍 New York City, NY
- Used multiple geospatial analysis (GIS) and dimension reduction techniques to find an optimization for affordable homeownership in the city. Developed a system to increase citywide homeownership by over 250% of status quo.
 - Conference cancelled due to COVID-19 Pandemic.
- 2020 ● **MLB Team Success: Offense vs. Defense³**
The Federal Reserve Bank of Minneapolis 📍 Minneapolis, MN
- Analyzed the importance of different statistics on predicting Win/Loss percentage and strategic paradigm shift in MLB. Coauthors Ryan Brauer and Jake Dujmovic.
 - First Prize Winner at Minnesota Economic Association General Conference
- 2019 ● **Forecasting Soybean Futures: Prophet & VAR⁴**
MinneMUDAC 2019 📍 Eden Prairie, MN
- Accurately forecasted the price of three target soybean futures securities. Model comprised of an ensemble of Facebook Prophet and Vector Autoregression. Model Accuracy ~99.5%. Coauthors Lindsey Hawk and Lindsay Steiger.
 - 2nd Place Overall & Analytical Acumen Award Winner
 - Invited to present to industry leaders at FASTCON 2020
- 2019 ● **The Future of Renewable Energy in New York City**
BAC @ MC 2019 📍 New York City, NY
- Optimized and analyzed a solution to convert half of New York state's energy needs to renewable energy. Coauthors Shanoah Harren, Lindsay Steiger, and Leah Wenner.
 - 4th Place Overall

PUBLICATIONS

- 2021 ● **Dermatology Landscape: Continued Growth Within the Excelera Network⁵**
ExceleraRx and ShieldsRx Blogs
- Coauthor with Angela Ouyang
- 2020 ● **COVID & Oncology – The Effects on Health System Specialty Pharmacies⁶**
ExceleraRx Blog
- 2020 ● **Predicting Inactivity in Oncology Patients: Machine Learning Classification in The Excelera Network**
